Pre-trip Checklist

- Check beneath RV for leaks, loose objects, or anything out of the ordinary
- Check all fluid levels: oil, coolant, washer fluid, brake fluid, etc.
- Check Tire Pressure and fill according to vehicle load
- Check for unusual tire wear
- Check engine starting battery: clean connections, proper state of charge
- Make sure all turn signals, running lights, and hazard lights are working
- Check horn operation
- Verify that the generator (if equipped) starts, runs, and delivers power
- Turn on fridge: For absorption refrigerator, operate it on gas and look at burner to see if the flame is blue.
- Check the air intake filters on your air conditioner and clean as necessary
- Verify that the fire extinguishers are present and fully charged
- Test smoke, carbon monoxide, and propane leak detectors
- Ensure kitchen and roof vents function properly
- Make available RV manuals, appliance manuals, etc. (download or print)
- Check operation of waste tank level indicators (start trip on empty)
- Check operation of water heater
- Charge batteries on accessories (Tire Pressure Monitor, walkie talkies, etc.)
- Fill Propane
- Fill fresh water
- Add any needed chemicals (or compost medium) to holding tanks
